Horizon Health Care Partners

Proposed structure for the new website · Prepared by Pracxcel · August 2026

This document sets out the proposed page structure and navigation for the Horizon Health Care Partners website. It shows every page we plan to build, how the pages are grouped, and how the main menu and footer are organised. The structure is designed around the three focus services, weight loss and peptides, men's and women's health, and medicinal cannabis, with a full set of general telehealth and supporting pages around them. Every page guides visitors toward the free pre-screening quiz and a booked consultation.

5. A few things to confirm together

- Business hours to display across the site.
- Final pricing for each service, so the service and pricing pages match.
- Practitioner names and AHPRA registration numbers, which appear on the practitioner profiles.
- Sign-off on the Medicinal Cannabis page before it is published, as this is regulated content.
- Whether to keep the separate horizonclinic.com.au brand, or bring everything under this website.

Once these are confirmed, the full page-by-page written content is ready to build.
