# What we heard — the state of Horizon Health today

**Nurses sitting idle. Leads not converting. Six months of the wrong marketing agency.**

FROM YOUR DISCOVERY CALL

## PREVIOUS AGENCY

\$1,650/mo · Meta-only · 6 months · leads "pretty poor, really cold" — being let go.

## CAPACITY

3 nurse practitioners live now + 2 GPs joining end-August 2026 — sitting idle.

## STATE OF PATIENT FLOW

Conversions are coming through the website — not through Meta ads.

## STRATEGIC PIVOT

From MC-only to peptides (weight loss) + men's & women's health + medicinal cannabis — launching end-August.

## WHAT YOU ALREADY HAVE

1,200 Google reviews · 4.5★ on horizonclinic GBP · brand #1 organic + map pack for "horizon clinic".

# What we heard from you

## ON PREVIOUS AGENCY

*"The leads are pretty poor, some of them are really cold. It doesn't convert much. The ones which I've converted lately are coming through the website itself — not through the Meta ads."*

## ON IDLE CAPACITY

*"There's just sitting there idle... we can only pay if the patients are booking. So they're coming in through and they're converting into a real patient. That's what I want to see."*

## ON THE STRATEGIC PIVOT

*"We're getting in GP, weight loss and peptides as well — men's and women's health, chronic disease. I'm just about to launch more services at the end of this month."*

## ON THE INHERITED WEBSITE

*"When we created that website, it was mainly for medicinal cannabis. It's not geared towards what have you pivoted."*

## ON WHAT YOU NEED

*"How many patients are guaranteed to come through your doors. Otherwise, we'll give you a part of the money back... I'm still learning. I'm in a very new phase."*

# The cost of idle practitioners

## THE UNUSED CAPACITY OPPORTUNITY

**\$14K – \$22K**

of stranded monthly consult revenue sitting in unused practitioner-time

*Add the 24-month LTV compounding on those first-visits and every idle month costs ~\$150,000+ in stranded lifetime value.*

**Every idle month is ~360 patients going to Alternaleaf, Juniper, Mosh — plus the LTV compound they take with them.**

## HOW WE GET THERE

**5**

practising FTE (3 nurses + 2 GPs end-Aug)

**~860**

realistic consult slots/mo at 55–65% util.

**~500**

estimated current monthly delivered consults

**~360**

slot gap per month = idle-practitioner cost

**\$40**

blended consult fee (peptides + MC + men's)

**\$0**

currently tracked in Google Ads attribution

# How a 2026 patient actually chooses a telehealth clinic

Four stages. In peptides, MC, and men's health telehealth — you either show up at every stage or the patient books with a competitor before they finish scrolling.

## 01 SEARCH

74%

of AU health-info searches now start with Google or an AI overview.

*If you're not top-3 for "peptides for weight loss", "medicinal cannabis prescription", or "ED treatment online", you're invisible before the patient sees your reviews.*

## 02 COMPARE

~9 in 10

health consumers read reviews before booking (5+ competing profiles average).

*Your 1,200 Google reviews at 4.5★ is a moat — but your 2.4★ Trustpilot listing on the brand SERP undoes it.*

## 03 VALIDATE

<90s

is how long a telehealth patient spends deciding on your website.

*Trust signals — AHPRA numbers, transparent pricing, credentials — drive checkout. Your site was built for MC-only.*

## 04 BOOK

~11min

median from first search to booked consult in AU peptide/MC telehealth.

*Any friction — slow page, unclear pricing, no online booking — drops conversion by 30–50%.*

# The direct competitors winning telehealth Australia right now

Live audit of direct AU telehealth competitors across peptides, MC, and men's/women's health. Directories (HotDoc, HealthEngine, Bloomly) excluded.

| Clinic                | Vertical focus                            | Google reviews       | Ads     | Organic strength                  | Threat to Horizon                |
|-----------------------|-------------------------------------------|----------------------|---------|-----------------------------------|----------------------------------|
| Horizon Health (you)  | MC · pivoting to peptides + men's/women's | 1,200 · 4.5★         | —       | Brand-only · #0 non-brand         | (baseline)                       |
| Alternaleaf (Montu)   | MC (200K+ patients)                       | thousands · 4.6★+    | ✓ 12 kw | 96 #1 positions · 31.5K clicks/mo | Direct — MC dominant, expanding  |
| Juniper (Eucalyptus)  | Weight loss / GLP-1                       | large                | ✓       | Dominant paid + SEO               | Direct — women's peptides leader |
| Mosh (Eucalyptus)     | Men's health / hair / weight              | large                | ✓       | Dominant paid + SEO               | Direct — men's telehealth leader |
| Pilot (Eucalyptus)    | Weight loss / TRT / ED                    | large                | ✓       | Dominant paid                     | Direct — men's weight loss + ED  |
| Polln (Nectar Brands) | MC                                        | ~20K patients · high | ✓       | 8 #1 · 2.9K clicks/mo             | Direct — premium MC              |
| Cannadoc              | MC (\$59 pricing)                         | mid                  | —       | 4 #1 · 1.1K clicks/mo             | Direct — same price point        |

Every direct competitor with strong SEO is also running Google Ads. You're the only clinic on this list with a class-leading review base (1,200) and zero paid presence — you have the trust asset, none of the reach.

# What Australia is searching for across your 3 focus services

## NATIONAL CATCHMENT

20.8M

AU adults · 100% telehealth-eligible

## MONTHLY COMMERCIAL-INTENT SEARCHES

~90,000+

across peptides + men's health + MC clusters

## ADDRESSABLE PATIENTS

~4.5–5.5M

AU adults with a plausibly treatable condition across your 3 services

| Keyword cluster                   | Vol/mo (AU) | Intent                      | Your rank       | Est. NPs/mo if top-3 |
|-----------------------------------|-------------|-----------------------------|-----------------|----------------------|
| peptides australia                | 40,500      | Commercial                  | Not ranking     | ~120/mo              |
| GLP-1 australia                   | 14,800      | Commercial (bid restricted) | Not ranking     | ~35 (organic only)   |
| peptides for weight loss          | 9,900       | Commercial                  | Not ranking     | ~30/mo               |
| erectile dysfunction treatment    | 5,400       | Commercial                  | Not ranking     | ~18/mo               |
| peptide clinic australia          | 2,400       | Commercial                  | Not ranking     | ~7/mo                |
| semaglutide australia             | 2,400       | Commercial (bid restricted) | Not ranking     | ~7 (organic only)    |
| buy peptides australia            | 1,900       | Commercial                  | Not ranking     | ~6/mo                |
| medicinal cannabis prescription   | 720         | BOFU                        | Not ranking     | ~5/mo                |
| medicinal cannabis clinic near me | 140         | BOFU (local)                | via HotDoc only | ~1/mo                |

Combined top-3 capture across biddable + SEO-recoverable clusters = ~135–165 net new patients/mo at maturity (Momentum tier).

### BRAND SEARCH INSET

"horizon clinic" 880/mo · "horizon health" (AU-slice) ~600/mo → #1 organic + map pack today. No competitor paid-poach yet. First 30 days: brand defence live to lock this in cheaply before Alternaleaf/PolIn notice.

# Where you're invisible right now

## 01 Google Search Visibility

CRITICAL

Zero organic ranking in top 20 for every non-brand commercial-intent keyword across peptides, GLP-1, men's health, and MC. Alternaleaf owns 96 #1 positions; you own 8 (all brand). 12 vs 661 keyword count.

## 02 Local Map Pack Coverage

DEFENDING

Map pack #1 on "horizon clinic" only. Zero non-brand map pack presence.

## 03 Retargeting & Speed-to-Lead

LEAKING

No pixel-based retargeting on peptide/men's health traffic. Prior Meta agency ran without CAPI, without attribution, without funnel visibility. Screening-quiz drop-offs never recovered.

## 04 Attribution & Tracking

ZERO VISIBILITY

No call tracking. No per-channel CPL. No intelliLens (or equivalent). Your insight — "conversions come through the website, not Meta" — is a gut-feel not a data-backed observation. Can't optimise what you can't measure.

### THE COST OF INVISIBILITY

**~90,000+**

qualified monthly searches you're not capturing

**150–250**

NPs/mo going to Alternaleaf / Juniper / Mosh / Polln

**\$14K–\$22K**

stranded monthly consult revenue

# Compliance exposure

Advertising a regulated health service in medicinal cannabis + peptides + hormone therapy is now a top-3 TGA enforcement priority. We fix the exposures before campaigns go live — included in your retainer.

## TOTAL EXPOSURE

\$180K – \$360K

in potential penalties across 4 identifiable current exposures

## TGA DEC 2025 ENFORCEMENT WAVE

\$627K in fines across 8 competitor MC clinics (Releaf \$131K · Botanic Wellness \$244K · plus 6 others).  
Two-year total: \$2.3M+.

HIGH

\$18K – \$6.6M

#1

### Screening quiz that gates prescriber decisions

horizonhealthcarepartners.com.au/quiz + horizonclinic intake · AHPRA 9 July 2025 guidance: online questionnaires "coaching patients to say the right thing"

HIGH

\$60K – \$120K

#2

### Practitioner AHPRA registration numbers not displayed

About + practitioner listings, both sites · National Law s.133 — Guidelines for advertising a regulated health service

HIGH

Risk multiplier

#3

### Dr William Bay listed as prescriber

HotDoc + Horizon Clinic sites · Ongoing high-profile regulatory history — any AHPRA complaint against Horizon inherits his footprint

HIGH

Aligned to Dec 2025 fine wave

#4

### "Plant-based / natural therapies" euphemism for MC

FAQ + service pages · TGA Dec 2025 action explicitly cited "indirect terminology like plant medicine" as s.42DLB breach

## From cold Meta leads and zero tracked acquisition **to 110 new patients / month.**

*Forecast based on 6-month capacity-aware compounding model. Momentum tier.*

### TODAY

- ~500 consults/mo, mostly historic MC brand follow-ups
- \$1,650/mo on Meta ads · no attribution · cold leads
- 4 AHPRA/TGA exposures live across public sites
- ~\$14K–\$22K/mo stranded practitioner-time
- Zero tracked patient-to-source attribution
- Website built for MC-only, not for the pivot

### MONTH 6 · WITH PRACXCEL

- ✓ **110 new patients/mo — booked across peptides + men's/women's + MC**
- ✓ Google + Meta (retargeting) + SEO compounding together
- ✓ AHPRA-clean pivot-ready website + intelliLens live
- ✓ ~\$50K+/mo first-year revenue from new patients (LTV higher)
- ✓ Full patient-to-source attribution end-to-end
- ✓ Patient Booking Promise written into the contract

# Our 3-step growth system

*Built for consult-first AU telehealth verticals under active AHPRA/TGA scrutiny.*

## STEP 1

### Be Found First: SEO & Google Ads

- ✓ Google Business Profile optimisation + successful verification (currently declined 3x — we fix)
- ✓ Google Ads on biddable clean-intent terms: "peptide clinic", "weight loss doctor online", "ED treatment", "menopause support online"
- ✓ Brand-defence campaign on "horizon clinic" / "horizon health" — locks the front door before Alternaleaf / Polln poach
- ✓ Local SEO + AI/LLM-search optimisation for condition-led queries where Google Ads is restricted

→ **More visibility on unrestricted terms = more qualified inquiries = more booked consults.**

## STEP 2

### Be The Obvious Choice: Website, Reviews, Social Proof

- ✓ Pivot-ready AHPRA-compliant website (included, \$7,500 value) — rebuilt for peptides + men's/women's + MC as 3 patient journeys
- ✓ AHPRA registration numbers displayed on every practitioner page (compliance fix in Week 1)
- ✓ SEO-optimised condition-led content authority (this is where you close the gap Alternaleaf built)
- ✓ Automated 5-star review collection via Repuboot + Trustpilot recovery (bury the 2.4★ on your brand SERP)

→ **Patients only book telehealth practitioners they trust — and trust is measurable.**

## STEP 3

### Stay Top-of-Mind: Meta Retargeting + Recall

- ✓ Surgical retargeting + reactivation only — cold prospecting on Meta is not economic in these verticals
- ✓ Site retargeting (screening-quiz completers, service-page bouncers, blog readers)
- ✓ Recall reactivation via CAPI-powered custom audiences (past patients due for follow-up)
- ✓ 7d-click + 1d-view attribution, Andromeda-aware measurement

→ **We recapture the almost-converters. We don't burn budget prospecting cold where compliance stops us.**

# Your 6-month curve to 110 new patients per month

*Forecast for Momentum tier. Conservative. Capacity-aware. Compounding.*

BY MONTH 6

# 110

new patients per month

Booked across all 3 services

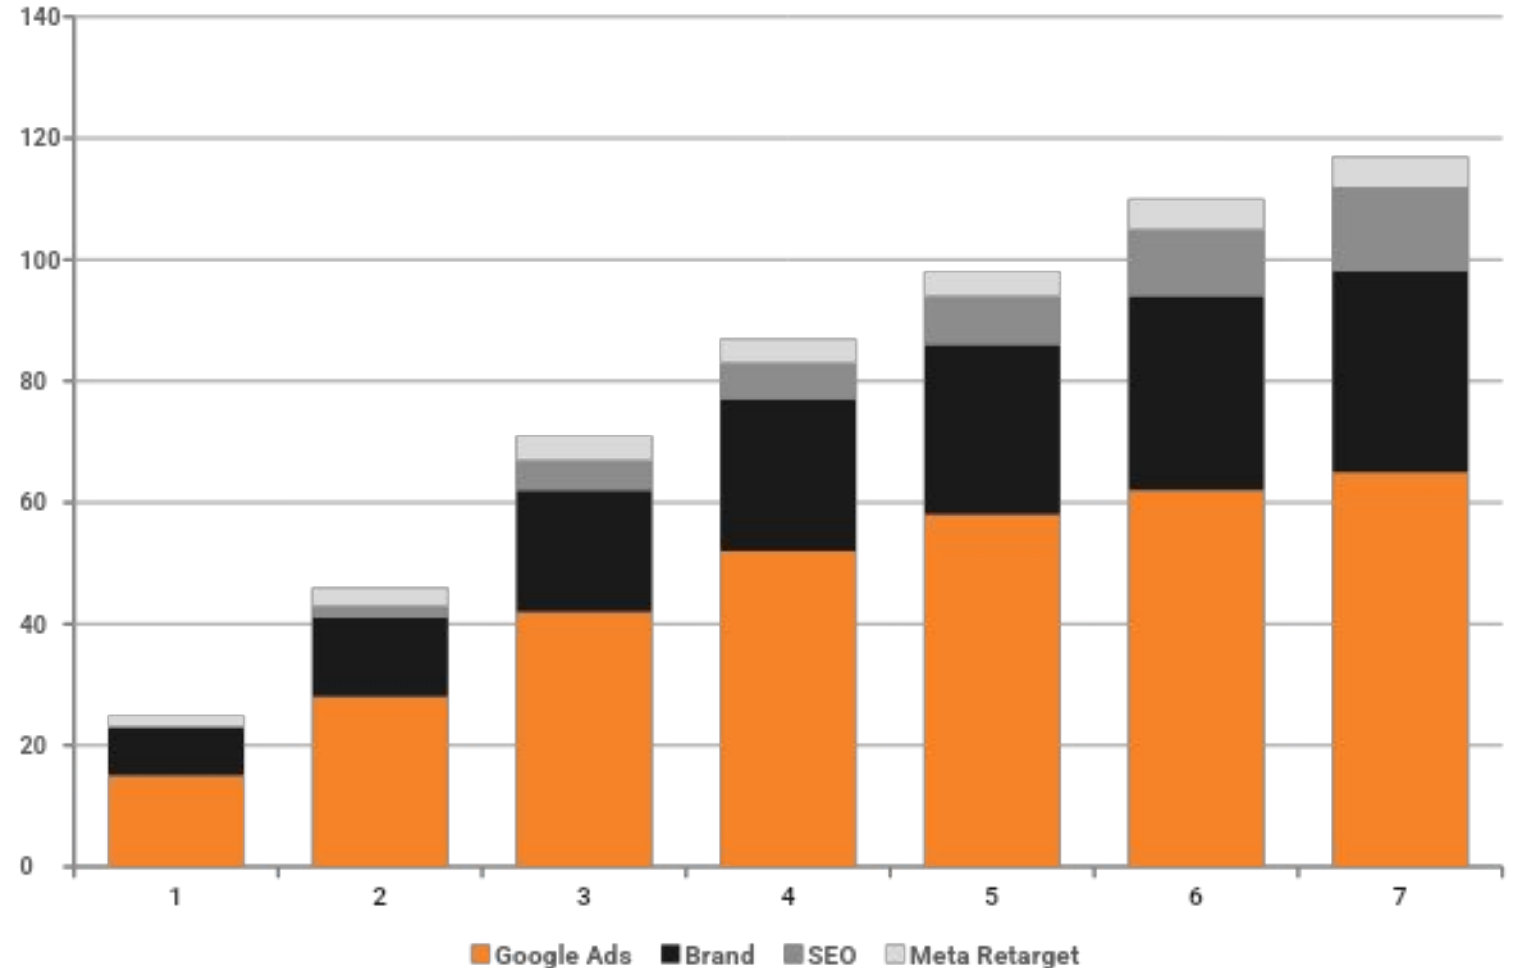

**~\$50K+**

first-year revenue per month

*~1,119 total new patients across Year 1 ·*

*~115/mo sustained M7+*

Monthly new-patient bookings by channel

# Google Ads — The First Patients Through The Door

*Keyword priority + the math. Momentum tier.*

## KEYWORD CLUSTER PRIORITY

TOP

### Brand defence

"horizon clinic" · "horizon health" · brand+service.

TOP

### Weight loss / peptides (condition-led)

"weight loss clinic online" · "medical weight loss AU" · "peptide clinic".

TOP

### Men's / women's health (condition-led)

"ED treatment" · "menopause support online" · "testosterone check".

TOP

### MC (compliance-safe framing)

"alternative medicine clinic" · "chronic pain telehealth" · never product-led.

PARK

### S4/S8 brand names (GLP-1, semaglutide, CBD, THC)

Cannot bid — Google + TGA policy. SEO captures these; retest quarterly as policy evolves.

## THE MATH · MOMENTUM TIER (AT MATURITY)

Blended CPC (biddable clean terms)

**\$6.50**

Estimated monthly clicks

**~615**

Landing → screening-quiz completion

**35%**

Screening → booked consult

**50%**

Effective click-to-booking

**17.5%**

Booked new patients from Google/mo

**~60**

# Meta Ads — surgical, not speculative

# \$627K

total TGA fines issued to competitor MC clinics in the Dec 2025 enforcement wave — largely for advertising creative, including on Meta.

*Meta's cannabis + pharmaceutical policies + AHPRA's July 2025 warning on aggressive DTC targeting = cold prospecting is a compliance and economic dead-end for your services. So we don't.*

01

## Site Retargeting

Screening-quiz completers, service-page bouncers, blog readers. Warm audiences only. CAPI-powered — attribution survives cookie deprecation.

02

## Recall Reactivation

Past patients due for medication review, product change, annual re-authorisation. Custom-audience-driven, permission-based.

03

## Brand Awareness (defensive)

Instagram brand presence on the peptide/wellness aesthetic  
Juniper/Mosh dominate. Not primary acquisition; brand-shield.

# Tracking & Transparency

**Know exactly how many patients are coming from online efforts.**

Pracxcel's **'intelliLens'** is the ULTIMATE end to end tracking and attribution platform. It enables real time decision making on actual user engagement from first exposure through to lead generation.

## Granular Call Tracking

Dedicated tracking numbers with full call recording. We attribute every phone call to the specific platforms that generated it.

## Monthly ROI Reports

Know your exact Cost Per Lead (CPL) and Cost Per Acquisition (CPA) by channel.

## The Transparency Promise

You have full visibility into your data with 24/7 access to the dashboard.

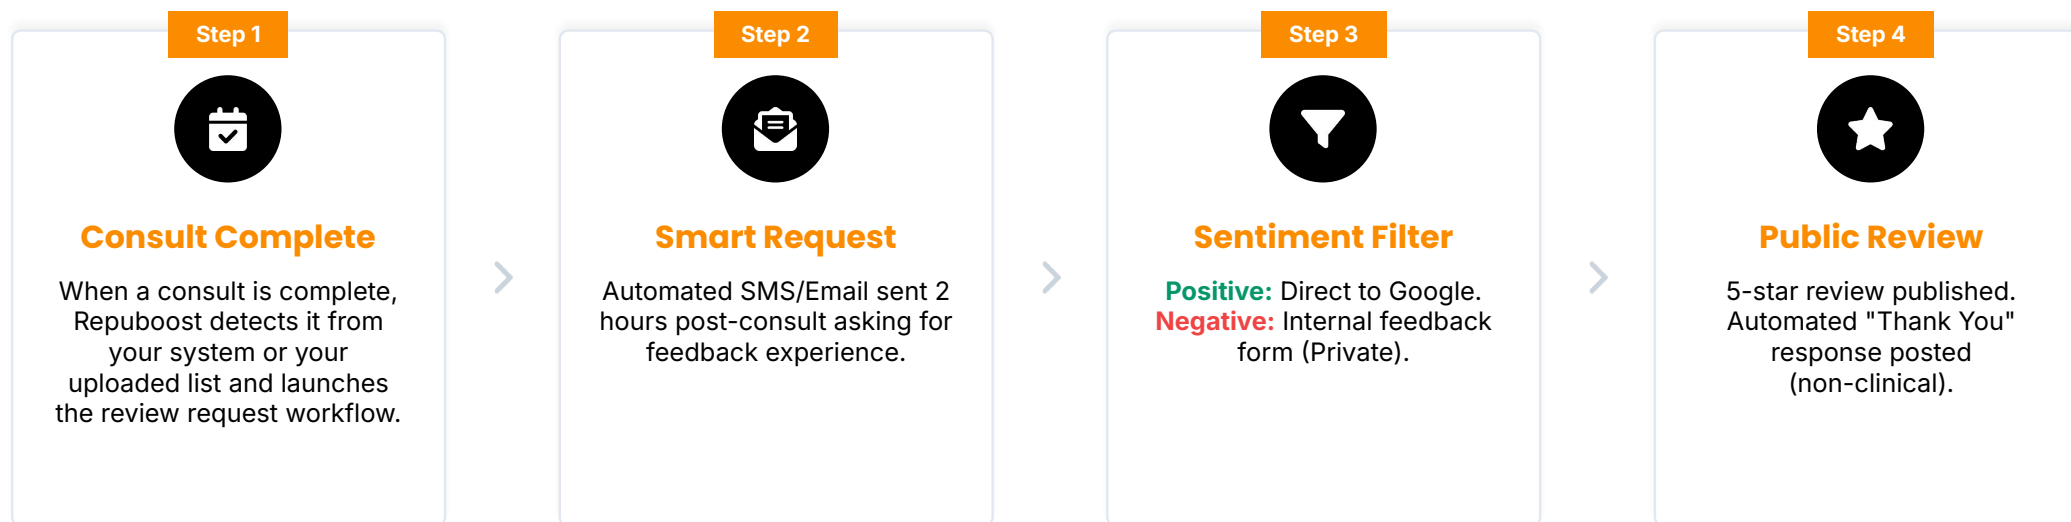

## Strategy Cadence

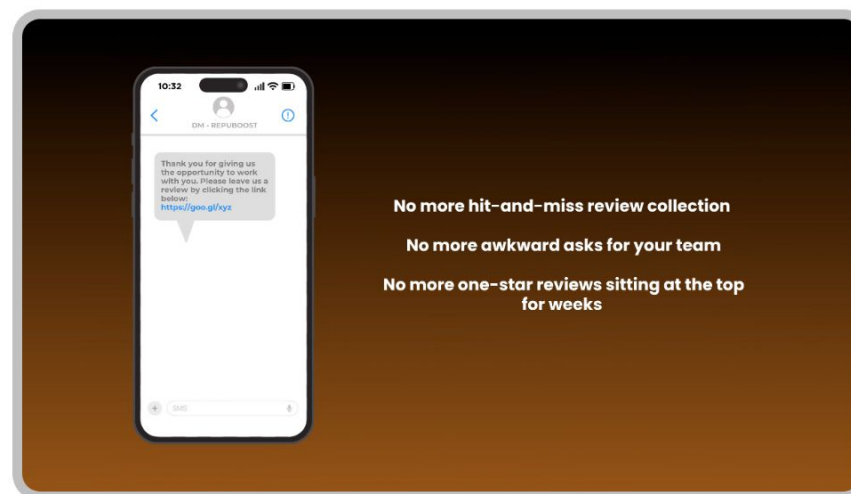

Monthly strategy calls to review performance and Quarterly deep dives to refine the roadmap. You are never left guessing.

# Build a 5-Star Reputation With Repuboost

- Your clinic deserves a reputation that reflects the care you deliver
- Every patient receives a branded review invite after their visit
- Positive experiences lead to visible five star reviews on Google
- Patients with concerns are invited to share feedback privately
- The entire process stays compliant with AHPRA and the Privacy Act
- You track everything in real time from your dashboard

# A Complete Growth Engine

*Everything the Patient Engine needs to fill your practitioners' calendars — bundled.*

## ASSETS & FOUNDATION

- High-Converting Pivot-Ready Website **(included, \$7,500 value)**
- Secure Hosting & Maintenance
- Conversion Rate Optimisation (CRO)
- Consult Booking Integration
- intelliLens Dashboard
- AI Call Tracking Numbers
- Compliance Register (AHPRA + TGA per-page audit)

## TRAFFIC & ACQUISITION

- Google Ads Management (3-service clusters)
- Local SEO + AI-Search Optimisation
- GBP Verification & Optimisation
- Landing-Page / Split-Test Program
- Facebook & Instagram Retargeting
- Content Cluster Program (condition pages)

## TRUST & RETENTION

- Automated Review System (Repuboost)
- Trustpilot Recovery Program
- Advanced-Level Lead Tracking
- Reactivation Campaigns (past patients)
- Practitioner-Profile Compliance Rewrite

## STRATEGY & CONSULTING

- Monthly Strategy Calls
- Quarterly Deep-Dive Reviews
- Complete Solution — live in ~3 weeks
- Compliance Watch (AHPRA + TGA real-time)
- Multi-service Funnel Architecture

**NO SETUP FEES · NO ONBOARDING CHARGES · NO HIDDEN ADD-ONS**

*We handle the infrastructure. You focus on the patients.*

# Practices that now run like engines

# The Patient Booking Promise

*We Put Our Skin In The Game. You Shouldn't Carry All The Risk.*

## At least 60 new patients every month — guaranteed.

*If we don't generate at least 60 new patient bookings in any qualifying month, the Risk-Share Bond (\$1,500) is refunded for that month.*

### WHY THIS IS A SAFETY NET, NOT A TARGET

#### A Low Bar For Security

55 is set below our forecast (110). We calibrate the floor to be a floor, not a target.

#### Performance Incentivised

Our goal is your PBP floor + more. We make more if you make more. PBP is our alignment mechanism.

#### Zero Risk On Booking vs Show-Up

Guarantee is based on BOOKED consults, not attended. We can influence whether someone books; we can't make them attend. Fair.

#### High Return Focus

Not on presentations or promises. On booked patients, in your intelliLens dashboard, month after month.

**\$1,050 refundable · 3-month initial term · 30 days notice thereafter · No long-term commitments · No reconciliation nightmares**
